HONR 311.041 (Cross Listed with ENGL 301.01H) [3492]

Fairy Tale Fictions

Ryan Habermeyer • MW 11 a.m.-12:15 p.m. • AC302

This seminar focuses on the composition of original fairy tales. Taking, to hear Vladimir Nabokov's claim, "All great books are also fairy tales," we explore the rich traditional history and eclectic permutations of folk tale in world literature, in particular, the special role of fairy tale as a parable and deep history in the modern world, through the lens of color. There will be a brief fairy tale bootcamp at the beginning of the semester, no prior fairy tale reading course is required. To begin our experiment, we read original, reissued, fairy tale anthologies, including the social, traditional and historical relevance of the fairytale from Italy, France, Germany, Russia and beyond, with close consideration of the adaptation and transformation of classic tales in contemporary popular fiction, and non-fiction. This course pairs with Dr. Baham's HONR 211 seminar, Campbell's Legend and Mythology. While jointly required, optional for both classes; highly recommended for those doing a reading and assignment are coordinated with Dr. Baham in order, to give the full range and depth of critical

MATH 201.003H [3398]

Calculus I

Michael Bardzell • MWF 1-1:50 p.m., HS113 • T 1-1:50 p.m. HS111

In this course, you will explore the fundamental concepts of calculus, including limits, derivatives, and applications of integration.

Meets General Education IVB or IVC. May not receive credit for both MATH 198 and MATH 201.

Prerequisite: C or better in MATH 140 or equivalent

BIOL 101.051H

Fundamentals of Biology

Christina Bradley • LAB: T 1-3:40 p.m., HS 250 • LEC: T 12:30-1:20 p.m., HS 109

Gain an understanding of the basic concepts and topics of biology, including the cell, genetics, ecology, and evolution. Explore the structure and function of various biological systems, from the molecular level to the organismal level. Laboratory work includes dissection and observation of various organisms.

Meets General Education IVA or IVB

BIOL 215.011H & BIOL 215.010 [2283]

BIOL 215.011H & BIOL 215.010 [2283]

Anatomy and Physiology I

Susanne Daly • LAB: TR 2-3:15 p.m., HS 253 • LEC: TR 12:30- 1:45 p.m., HS 253

Gain an understanding of the cell, tissues, and organs, and how they function together. Explore the structure and function of the human body, from the molecular level to the organismal level. Laboratory work includes dissection and observation of various organisms.

Meets General Education IVA or IVB. Three hours lecture; three hours lab per week.

Recommended Prerequisites: BIOL 101 or 213.

BUSINESS HONORS COURSE OFFERINGS

INFO 211.111H [2429]

Information Systems Concepts for Management

Bill Burke • M 10-11:45 p.m. • (Hybrid) PH248

Designed for undergraduate students, this course provides a comprehensive overview of information systems and their role in management. Topics include data management, database systems, and the impact of technology on business operations. The course includes hands-on experience with various information systems and their applications.

Enrollment preference given to LLC students.
